## ➤ CAREER OBJECTIVE

Seeking a challenging position in a reputed organization where I can learn new skills, expand my knowledge, and leverage my learning. Secure a responsible career opportunity to fully utilize my training and skills

## ➤ TECHNICAL

C  
Python  
MERN Stack

## ➤ SOFTWARE

Adobe  
Git  
SSH

## ➤ SKILLS

Critical Thinking  
Analytical skills  
Adaptability

## ➤ CO-CURRICULAR

Workshops  
Interns  
Seminars

## ➤ PROJECTS

Built a full-stack e-commerce application for selling pappads, handling everything from product listing and cart functionality to order management and payment integration.

I have worked with local LLMs and developed chat models, PDF summarization models, and a speech-to-speech system to enhance communication.

Developed a CO-attainment system for faculty to calculate students' CGPAs and generate performance graphs, allowing early insights into academic trends before official mark announcements.

## ➤ INTERNSHIPS

I have 6 months of experience as a backend development intern, during which I tackled various problems across multiple domains

Completed a 6-month training program at Sayer, focused on tackling real-world problems and enhancing problem-solving skills. As part of the program, developed a project called Zemila for a nonprofit organization.

## ➤ AREA OF INTEREST

Data Scientist  
Data Analyst

## ➤ EDUCATION
